## COMPANY PROFILE

Absolute Steel is a US manufacturer of a tubular steel building system that is adaptable to a wide variety of purposes. Our products are organized into five categories: Buildings, Housing, Relief Housing, Carports (commercial and residential) and Shade Covers. The keynote to a structure from Absolute Steel is the simplicity of assembly which permits inexperienced labor with common tools to easily build an engineered structure. Unlike other steel structures, an Absolute Steel structure is packed and shipped in easy to manage bundles, which permits delivery to most any global location with a minimum of special equipment or mode of transport.

***Designated as a Small Business, Absolute Steel is committed to excellence in creating innovative and flexible structures for all our customers.***

## ABOUT ABSOLUTE STEEL

Since founding in 1999, Absolute Steel has fulfilled building orders to over 100 government agencies, over 1000 corporate clients and thousands of individual public sector purchases. Additional services may include:

- Site evaluation & selection
- Structural Engineering
- Onsite management & Training
- Shipping Logistics—domestic or international

The company maintains production facilities on its own properties in Arizona and Texas. We utilize proprietary equipment (robotic welders/multiple piece benders) to ensure efficient and quality production thereby offering the best value possible.

The company's administrative infrastructure controls inventory and parts manifests for more than 4500 standard product sizes in more than 15 unique styles. As well as industry proven sizes, the company can accommodate most custom requests.

Currently, Absolute Steel's building system is in use in the following countries:

- United States
- Nicaragua
- Canada
- Iraq
- Afghanistan
